

WASHINGTON

WHO ARE TODAY'S STUDENTS?

Nationally, today's students are more diverse than any previous generation of college students: in age, race, and income level. They're more mobile and may not live on campus. Most participate in the workforce, either full-time or part-time. Work and family responsibilities beyond the classroom—whether that is on-campus or online—often compete with today's students' educational goals.

NATIONWIDE, TODAY'S STUDENTS ARE:

37%

OLDER THAN 25

IN WASHINGTON...

Jan Yoshiwara, Executive Director of the Washington State Board of Community and Technical Colleges and member of Higher Learning Advocates' Champions Network, oversees state education policy and strategic planning for the community and technical college system and works with higher education stakeholders to advance goals and policies.

// Higher education is about more than just getting job skills and a credential to help launch or advance your career, as critical as those things are. Education has the opportunity to develop and uplift the human potential of all, and we see that society as a whole benefits when opportunity expands. //

JAN YOSHIWARA'S POLICY POWER PLAYS:

- Increase access to higher education for low-income families through new financial aid and student loan pathways.
- Work with employers to develop alternate revenue streams to offset higher education costs for students.
- Provide people with the opportunity to get good jobs regardless of financial or educational circumstance.

WASHINGTON

SNAPSHOT: How do Washington's numbers stack up?

To better understand how Washington compares to the national higher education landscape, look to the data below detailing trends in enrollment, federal student aid, tuition and fees, earnings, and attainment comparing national and state level data.

ENROLLMENT

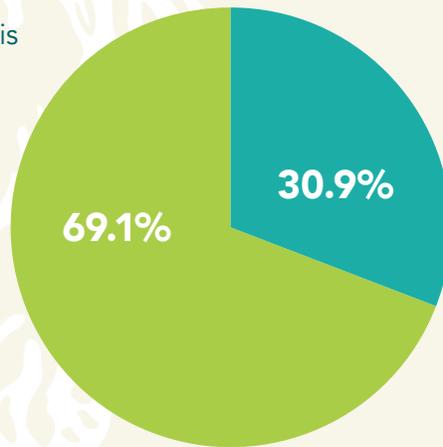

Washington's Fall Student Enrollment, 2017

Washington's total student enrollment is

370,908

69%

Washington students attend full-time.

but they face unique challenges, such as applying competencies learned in military service to civilian careers and academics.

HOW CAN FEDERAL POLICY HELP SET TODAY'S STUDENTS UP FOR SUCCESS?

Outcomes are critical for today's students—including completion, employment, equity, and value—to be gained from higher learning. Federal policy needs to catch up to the way that today's students are learning and reward institutions and systems that deliver the strongest career and educational outcomes.

FEDERAL FINANCIAL AID should be redesigned with a focus on the needs of a wide range of students, especially those who work full- or part-time, are financially independent, or need to enroll in courses outside the traditional two-semester approach. Redesign approaches could include rethinking Pell eligibility for workforce programs, or simpler loan repayment to match today's students' needs.

DATA gathered through federal, state, and workforce data systems should cover the full spectrum of today's students, not just first-time, full-time students. Today's students, families, schools, and taxpayers need clear information to make informed choices about higher learning.
